

## VEGECLEANSE™

COMPREHENSIVE FUNCTIONAL FOOD POWDER TO SUPPORT LIVER FUNCTION

756 G POWDER | NPN80061411 | VCL756-CN

**VegeCleanse™** is a functional detoxification powder that contains quality macronutrients to fuel detoxification pathways, a full multivitamin/mineral complex for detoxification enzyme support, and high levels of antioxidants for safe detoxification. This formula also contains a comprehensive array of herbs to promote healthy liver function.

### Healthy detoxification may help:

- Promote healthy digestion
- Improve occasional bad breath
- Support healthy energy levels
- Promote healthy joint function
- Support healthy skin and eyes

VegeCleanse™ features a plant-derived pea protein isolate made from non-GMO (non-genetically modified) North American grown yellow peas. This low allergen, easy-to-digest pea protein formula does not contain dairy, gluten, or lactose. It mixes easily with water or your favourite beverage to create a delicious drink with a smooth texture and pleasant berry-vanilla flavour. Distinguishing characteristics include an excellent array of amino acids- including high levels of BCAAs (branched chain amino acids), as well as non-detectable levels of harmful gastrointestinal lectins (not to be confused with lecithins). Lectins are found in plants such as grains, soybeans, and even in genetically modified foods. Evolutionary theory suggests that lectins evolved as a defense mechanism of the plant. Once ingested, lectins would cause gastrointestinal damage and upset which would deter the predator from eating the plant again, furthering the plant's ability to survive. Today, the concern is that the potential gastrointestinal damage from consuming lectins may reduce the absorption of vital nutrients.

VegeCleanse™ is ideal for those who have allergies or sensitivities to gluten, dairy or other animal proteins, and for those who would like to support the liver while promoting safe detoxification. VegeCleanse™ is fructose-free and is sweetened with the natural herb stevia.

**Recommended Dose:** Adults: Take 1 scoop once per day. Mix product well in 1-2 cups of liquid immediately before consumption. Take a few hours before or after taking other medications. (1 scoop = 36 g.) For use beyond 6 weeks, consult a health care practitioner. Use for a minimum of 3 weeks to see beneficial effects. Consult with your healthcare practitioner about your specific circumstances and any questions you may have.
